

Codebook: state_issue_analysis.csv

Page 1

This dataset reproduces the pooled and issue-specific state-level survey analyses. Each row is a respondent-issue observation with the variables needed for Tables 5, C1, C2, and the copartisan mechanism checks.

Variable	Description	Min	Max	Mean	NAs
participant_id	Stable participant identifier, prefixed by source survey. Values: Source prefix plus source respondent ID where available.				0
survey_source	Original survey source. Values: kff16_aca, kff17_aca, kff19_aca, abc02_budget, abc03_budget, pew11_budget, ces20_was_crime, ces20_was_schools.				0
topic	Issue area in the pooled state analysis. Values: ACA, Budget, Crime, Schools.				0
state	Respondent state abbreviation. Values: Two-letter postal abbreviation.				202
year	Survey year. Values: 2002, 2003, 2011, 2016, 2017, 2019, 2020.	2002.000	2020.000	2012.997	0
state_year_topic	Random-effect grouping variable for state-year-topic. Values: State-year-topic text label.				0
perception	Positive assessment of state or local conditions. Values: 1 = positive assessment, 0 = not positive.	0.000	1.000	0.398	0
owner_party	Party that owns the issue. Values: D or R.				0
own_013	Ordinal governing-party ownership measure. Values: 0 = non-owning party unified control, 1 = non-owning governor, 2 = owning governor, 3 = owning party unified control.	0.000	3.000	1.405	218
cond1_z	First z-scored objective/contextual condition measure. Values: Continuous z-score.	-8.514	5.954	0.002	206
cond2_z	Second z-scored objective/contextual condition measure. Values: Continuous z-score.	-5.004	7.331	-0.010	214
condition_index_z	Within-issue z-scored average of cond1_z and cond2_z. Values: Continuous z-score.	-6.326	6.816	-0.006	214
net_gub_approve_z	Z-scored net gubernatorial approval. Values: Continuous z-score.	-3.852	2.414	-0.000	793
condition_1	Name of the first condition measure. Values: Measure name.				0
condition_2	Name of the second condition measure. Values: Measure name.				0
pid	Three-category party identification. Values: 1 = Democrat/lean Democrat, 2 = independent/other, 3 = Republican/lean Republican.	1.000	3.000	1.953	344
gub_copartisan	Respondent shares the governor's party. Values: 0/1.	0.000	1.000	0.441	543
owning_party_governor	Owning party holds the governorship. Values: 0/1.	0.000	1.000	0.477	218
copartisan_owned_governor	Respondent is copartisan with an owning-party governor. Values: 0/1.	0.000	1.000	0.218	543
ideo3	Three-category ideology. Values: 1 = liberal, 2 = moderate/unknown, 3 = conservative.	1.000	3.000	2.113	2

This dataset reproduces the pooled and issue-specific state-level survey analyses. Each row is a respondent-issue observation with the variables needed for Tables 5, C1, C2, and the copartisan mechanism checks.

Variable	Description	Min	Max	Mean	NAs
white	Respondent coded white. Values: 0/1.	0.000	1.000	0.722	41
black	Respondent coded Black. Values: 0/1.	0.000	1.000	0.110	41
male	Respondent coded male. Values: 0/1.	0.000	1.000	0.489	0
bachelors	Respondent has a bachelor's degree or higher. Values: 0/1.	0.000	1.000	0.404	23
age_group	Three-category age group. Values: 1 = 30 or younger, 2 = 31–60, 3 = over 60.	1.000	3.000	2.118	109
weight	Survey weight. Values: Numeric survey weight.	0.093	7.924	0.998	0
